Osmoregulation in Arctic fish, 28.
Osmotic stress, response to, by Crustacea, 43.
Ova, Ascaris, x-irradiation of, 383.
Ova, Chaetopterus, x-irradiation of, 184.
Ova, sea urchin, phosphorus metabolism in, 276.
Ovary, Spisula, estrogenic material in, 180.
Oxygen, role of, in recovery of Ascaris eggs from x-irradiation, 383.
Oxygen consumption of potato, 288.
Oxygen uptake of insects, 108.
Oxygen uptake of oyster mantle, 92.
Oxyrrhis, taxonomy of, 196.
Oyster drill, rate of feeding of, 330.
Oyster mantle, respiration of, 92.

P-32 uptake by sea urchin eggs, 276.
Pachygrapsus, response to osmotic stress by, 43.
Pagurus, apostome ciliate parasites of, 132.
PAHL, G., AND C. S. BACHOFER. Anaerobic recovery of Ascaris eggs from x-irradiation, 383.
Palaemonetes, larval development of, 144, 162.
Parasite of crabs, 132.
Parasitic protozoan, growth-promoting factors for, 377.
Parenchyma, role of, in regeneration of Dugesia, 371.
PARSER, W. J. *See* A. PUNT, 108.
Periodicity in Uca, 7.
Periplaneta, oxygen uptake in, 108.
Permeability of sea urchin egg to phosphate, 276.
Permeability studies on Ulva, 249.
Persistent tidal cycles of motor activity in Uca, 267.
Phosphatase activity of echinoderm hybrid embryos, 21.
Phosphorus, metabolism of, by sea urchin egg, 276.
Phycobilin chromoproteins of Porphyra, 363.
Physiology of Arctic fish, 28.
Pigment, amino acid content of, in Porphyra, 363.
Pigment, red, in Drosophila cells, 220.
Pigment dispersion rhythms in Uca, 7.
Planarian, regeneration of, after colchicine treatment, 371.
Plankton as food for Palaemonetes, 162.
Platyhelminth, feeding in, 63.
Platyhelminth, morphology and life-history of, 254.
Platyhelminth, regeneration of, after colchicine treatment, 371.
Polarity, reversal of, in hydroid, 349.
Polycelis, feeding in, 63.
Polykrikos, taxonomy of, 196.
Polysaccharides, distribution of, during development of mushroom, 1.
Population density, role of, in radiocobalt accumulation in Tetrahymena, 390.
Porphyra, amino acids of, 363.
Porphyridium as food for Palaemonetes, 162.
Position of burrows of Uca, 7.
Post-irradiation treatment of Ascaris eggs, 383.
Potassium, replacement of, by rubidium, in Ulva, 249.
Potato, oxygen consumption of, 288.
Potential, action, of stomatopod heart, 358.
Pressure, barometric, effects of, on oxygen consumption of potato, 288.
Propanediol phosphate in sea urchin eggs, 276.
Prophase, sensitivity of to x-irradiation, 184, 305.
Protection of mice against radiation damage, 400.

Protective effects of anaerobiosis and cyanide against x-irradiation damage to Ascaris eggs, 383.
Protein metabolism of marine borers, 325.
Protein synthesis in Himanthalia, 81.
Protochordate, vascular budding in, 225.
Protozoan parasites of Crustacea, 132.
Protozoan, parasitic, growth-promoting factors for, 377.
Protozoan, radiocobalt accumulation in, 390.
Pugettia, osmotic regulation in, 43.
Punt, A., W. J. Parser and J. Kuchlein. Oxygen uptake in insects with cyclic carbon dioxide release, 108.
Pupae, insect, oxygen uptake of, 108.

RNA as growth-promoting factor for Endamoeba, 377.
Radiation effects on Chaetopterus eggs, 184.
Radiation effects on Molgula gametes, 171.
Radiation resistance of mice, 400.
Radiocalcium uptake by oyster, 92.
Radiocobalt accumulation in Tetrahymena, 390.
Radiophosphorus, uptake of, by sea urchin eggs, 276.
Rate of breathing of carp, 97.
Rate of feeding of oyster drill, 330.
Rate of larval development of Palaemonetes, 144.
Recessive mutant in Drosophila, 220.
Reconstitution of colchicine-treated Dugesia, 371.
Recovery of Ascaris eggs from x-irradiation, 383.
Red alga, amino acids of, 363.
Red cells in Drosophila, 220.
Regeneration of colchicine-treated Dugesia, 371.
Relationship between burrow position and tidal rhythm of Uca, 7.
Relationship between diet and development of Palaemonetes, 162.
Replacement of potassium by rubidium in Ulva, 249.
Reproduction, asexual, in Botryllus, 225.
Reproduction, asexual, in hydroid, 349.
Reptile, orientation in, 336.
Respiration of carp, 97.
Respiration of insects, 108.
Respiration of irradiated Ascaris eggs, 383.
Respiration of oyster mantle, 92.
Respiration of potato, 288.
Respiratory rates of crabs, 43.
Response of potato to barometric pressure, 288.
Response to osmotic stress by Crustacea, 43.
Retinal layers of toad, susceptibility of, to gamma irradiation, 137.
Reversal of polarity in hydroid, 349.
Reversible replacement of potassium by rubidium in Ulva, 249.
Rhythms of activity in Uca, 267.
Rhythms of oxygen-consumption by potato, 288.
Rhythmicity of Uca, 7.
Roentgen irradiation of Ascaris eggs, 383.
Roentgen irradiation of Chaetopterus eggs, 184.
Roentgen irradiation of mice, 400.
Roentgen irradiation of Molgula gametes, 171.
Roentgen irradiation of onion root tips, 305.
Rogers, K. T. Optokinetic testing of cyclopean and synophthalmic fish hatchlings, 241.
Rogick, M. D. Studies on marine Bryozoa. X., 120.
Root tip, Allium, effects of x-irradiation on, 305.
Round-worm eggs, x-irradiation of, 383.
Rubidium, replacement of potassium by, in Ulva, 249.

SALT exchange in Crustacea, 43.
Salvelinus, osmoregulation in, 28.
Sand dollar-sea urchin hybrid embryos, 21.
Scott, G. T., and R. DeVoe. The reversible replacement of potassium by rubidium in Ulva, 249.
Sea urchin egg, metabolism of phosphorus in, 276.
Sea urchin-sand dollar hybrid embryos, 21.
Sea weed, nitrogen and carbohydrate constituents of, 81.
Semilunar rhythms in Uca, 7.
Sensitivity of adult Molgula to x-rays, 171.
Sexual differentiation in Xiphophorus, 422.
Sexual dimorphism in gill area of crabs, 34.
Shell formation in oysters, 92.
Shrimp, larval development of, 144, 162.
Shrimp, mantis, electrocardiogram of, 358.
Shriner, J. *See* M. F. Bennett, 267.
Slater, J. V. Radiocobalt accumulation in Tetrahymena, 390.
Smith, Z. H. *See* D. S. Grosch, 171.
Solanum, oxygen consumption of, 288.
Solar-day cycles in oxygen consumption of potato, 288.
Sperm, Molgula, x-irradiation of, 171.
Sphinx, oxygen uptake of, 108.
Spiracle movements in insects, 108.
Spisula, estrogenic material in ovary of, 180.
Spontaneous motor activity, cycles of, in Uca, 267.

Sporulation in mushroom, 1.
Squilla, electrocardiogram of, 358.
STADLER, J., AND J. W. GOWEN. Contributions to survival made by body cells of genetically differentiated strains of mice following x-irradiations, 400.
Stenostomum, feeding in, 63.
Stomatopod, electrocardiogram of, 358.
Storage of food in flatworms, 63.
Strain differences in survival of x-irradiated mice, 400.
Stress, osmotic, response to, by Crustacea, 43.
Strongylocentrotus-Dendraster hybrid embryos, 21.
Strongylocentrotus, metabolism of phosphorus in eggs of, 276.
Studies in metabolism of phosphorus in sea urchin eggs, 276.
Studies on marine Bryozoa, 120.
STUNKARD, H. W. The morphology and life-history of the digenetic trematode, Microphallus, 254.
Sun, role of, in orientation of box turtles, 336.
Survival of x-irradiated mice, 400.
Susceptibility to gamma irradiation of toad retina, 137.
Swordtail fish, sexual differentiation in, 422.
Synophthalmic fish, optokinetic testing of, 241.

TADPOLES, Molgula, development of, from x-irradiated gametes, 171.
Taxonomy of Bryozoa, 120.
Taxonomy of trematodes, 254.
Taxonomy of unarmored Dinophyceae, 196.
Teleost, sexual differentiation in, 422.
Teleost hatchlings, optokinetic testing of, 241.
Temperature, role of, in irradiation damage to Ascaris eggs, 383.
Temperature, role of, in x-irradiation damage to onion root tips, 305.
Temperature, water, role of, in feeding of Urosalpinx, 330.
Temperature dependence of breathing rate in carp, 97.
Teredo, amino acid content of, 325.
Terrapene, orientation in, 336.
Testing, optokinetic, of cyclopean fish, 241.
Testosterone, effect of, on sexual differentiation of Xiphophorus, 422.
Tetrahymena, radiocobalt accumulation in, 390.
Thorocomonas as food for Palaemonetes larvae, 162.
Tidal cycles in Uca, 267.
Tidal rhythm and burrow position of Uca, 7.
Toad, gamma irradiation of, 137.
TRAGER, W. Excystation of apostome ciliates in relation to molting of their crustacean hosts, 132.
Trematode, morphology and life-history of, 254.
Triclad turbellarian, feeding in, 63.
Tunicate, vascular budding in, 225.
Turbellaria, feeding in, 63.
Turtles, orientation in, 336.

UCA, apostome ciliate parasite of, 132.
Uca, osmotic regulation in, 43.
Uca, relation between burrow position and tidal rhythm of, 7.
Uca, tidal cycles of activity in, 267.
Ulva, reversible replacement of potassium by rubidium in, 249.
Upogebia, osmotic regulation in, 43.
Uptake of oxygen in insects, 108.
Uptake of radiocobalt by Tetrahymena, 390.
Urosalpinx, rate of feeding of, 330.

VALLOWE, H. H. Sexual differentiation in the teleost fish Xiphophorus, as modified by experimental treatment, 422.
Variation of nitrogen and carbohydrate constituents during development of Himanthalia, 81.
Vascular budding in Botryllus, 225.
VILLEE, C. A. *See* D. D. HAGERMAN, 180.

WARNOWIA, taxonomy of, 196.
WATANABE, H. *See* H. OKA, 225.
Water temperature, role of, in feeding of Urosalpinx, 330.
Wave-length, role of, in survival of x-irradiated mice, 400.
WELLINGTON, F. M. *See* D. D. HAGERMAN, 180.
WHITELEY, A. H. *See* A. L. BOLST, 276.
Whole-body gamma irradiation of toad, 137.
Whole-body x-irradiation of mice, 400.
Whole-body x-irradiation of Molgula, 171.
WILBUR, K. M. *See* S. P. MARONEY, JR., 92.
Worm, planarian, regeneration of, 371.
Worms, feeding of, 63.

X-IRRADIATION of Allium, 305.
X-irradiation of Ascaris eggs, 383.
X-irradiation of Chaetopterus eggs, 184.
X-irradiation of mice, 400.
X-irradiation of Molgula, 171.
Xiphophorus, sexual differentiation in, 422.

ZOOPLANKTON as food for Palaemonetes, 162.
Zygotic lethality in Molgula after x-irradiation, 171.
